

Manual

Setting up the Server with MySQL

1. Open up MySQL and start up a server.
2. Open the QuizTable.sql file in the backend folder of the project.
3. Copy and paste everything that is in the QuizTable file and execute the code in your running server. That is it for the MySQL part.

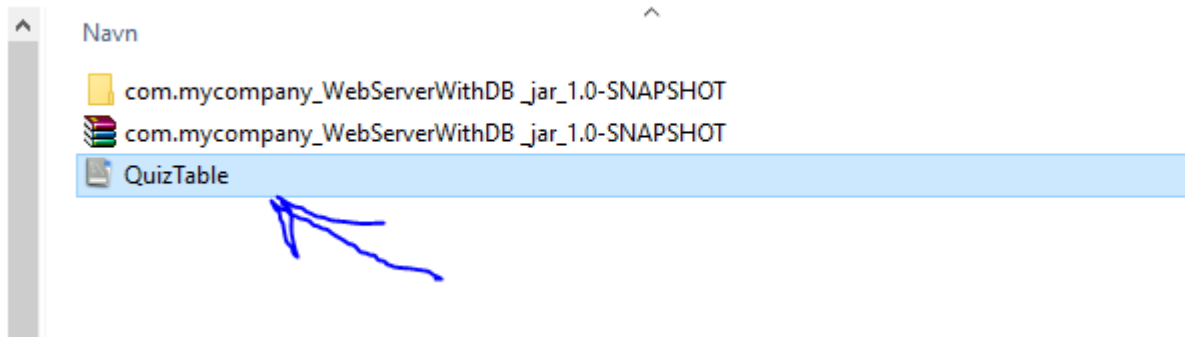

MySQL Connections

Local instance MySQL80

root

localhost:6666

Denne pc > Skrivebord > Uni > 3. semester > semesterprojectV3 > Semesterproject_E18 > backend

```
QuizTable x
